

**MESABOX Cassette
Telescopic Arm Awning**
Design in harmony with technology

The elegant MESABOX S9170 awning is an attractive shading system for large areas such as restaurant terraces and domestic patios.

The compact, linear design gives the MESABOX an elegant appearance. Thanks to patented telescoping technology, the fabric remains taut when the awning is open, regardless of the position. When the awning is retracted, the rounded end profile creates a box that protects the fabric and the telescopic arms from the damaging effects of the weather. Two fixing brackets make the awning easy to fix on a wall or from the ceiling. The incline angle can be easily adjusted.

The standard integrated electric drive can be conveniently expanded by means of optional controllers or an automatic sun/wind detection system.

MESABOX Telescopic Arm Awning:

Min width 3500mm Max width 7000mm
Min projection 2500mm Max project 4000mm
