

COMPACT RETRACTABLE ROOF SYSTEMS

COVERED | COMPACT ROOF SYSTEMS

COMPACT

The Covered **COMPACT** is the newest premium model of the Alpha Pergosystem Range. Its compact dimensions combined with its beautiful design and modern aesthetics stand out from many other system available on the market. The Revolutionary design of the arched fabric beams allows this system to be fitted level. The system includes an internal gutter on all four sides of the structure allowing the water to drain off through the columns/posts.

What distinguishes this system from other roof systems is its self-supporting structure which can be installed an where, making it ideal for clubs, pubs and ideal for creating private booths or outdoor seating for Restaurants. Due to the system being flat, it is easy to enclose all four sides using COVERED ZIPSCREENS, LOUVRED SCREENS or GLASS SLIDING PANELS making this roof the one to have for those area's critical for outdoor weather protection whilst entertaining.

COVERED | COMPACT JOINT ROOF SYSTEMS

COMPACT JOINT

The **COMPACT JOINT** is a roof system that attaches as an extension to any **COMPACT** unit. The **COMPACT JOINT** has the versatility to be used not only as a freestanding four post structure but can also be linked into multiple bays making an outdoor entertainment area at any space.

The **COMPACT JOINT** has the ability to keep adding modules/posts of 5.5 metres x 5.5 metres all-in-one unit larger than any other system on the market.

Removing the rear posts will allow the **COMPACT JOINT** or **COMPACT FREESTANDING** roofing systems to attach to the side of your house, office, building, restaurant, cafe or commercial workplace with the front posts with hidden downpipes drainage system.

COVERED | COMPACT WALL ROOF SYSTEMS

COMPACT WALL

The **COMPACT WALL** is a roof system that attaches to an existing building or facade with the option to keep adding modules to suit the desired space. By removing the rear posts the front posts act alone as the hidden water drains allowing your system to act like an extra room keeping you dry. The greatest feature of the **COMPACT** range of Roofs is their ability to be opened when required, allowing you to bask in the sunshine.

The **COMPACT** range has a number of optional add-ons such as GLASS SLIDING DOORS, LOUVRED PANELS as well as RETRACTABLE SCREENS and the Unique design of the Flat Roof Beams are perfect for all of these inclusions. LED lighting as well as ELECTRIC HEATERS can be additionally added to make this room your new favourite place to be. See our accessories page for additional information regarding these available options.
