Noblesse Sunroof

made to measure

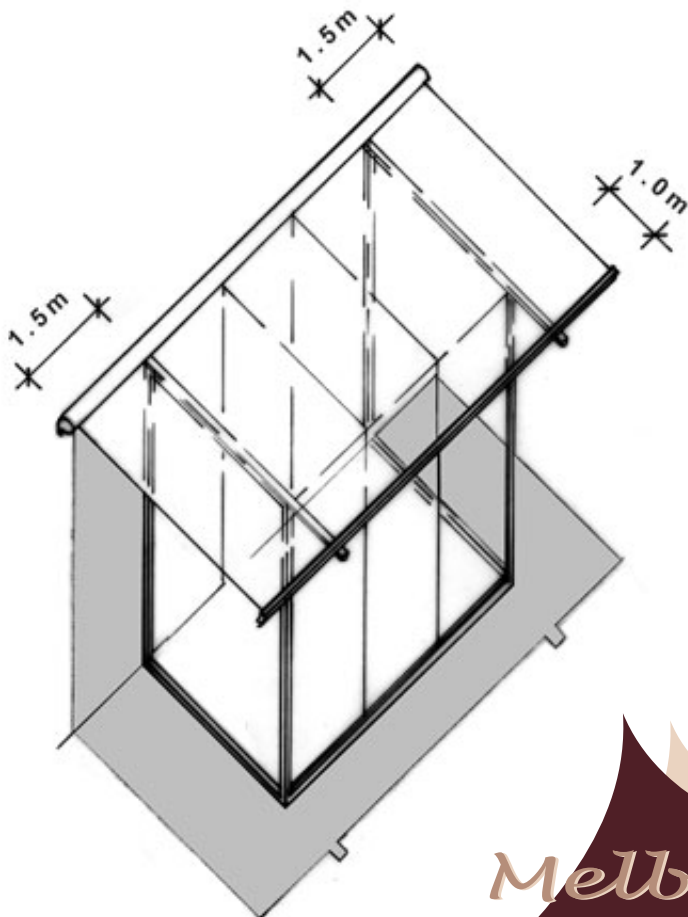

The Noblesse awning is mounted above a conservatory or pergola structure. This design incorporates the use of a frame mounted on guide tracks that operate using a gas compression spring system.

The Noblesse can extend up to 6 metres wide and 4 metres in projection. A feature of the Noblesse is that the awning cover area is not limited by the size of the structure on which the awning is being mounted.

The awning width can extend up to 1.5 metres wider than the pergola frame (each side) and up to 1 metre beyond the front of the structure, providing extended shade cover whilst maintaining unobstructed views.

The Noblesse can be operated manually or be motorised
