Waterfall Window Awning

Waterfall windows create a wonderful indoor living space with an open outdoor feel. But by having a glazed roof and glass facade, they often become too hot to use in summer. The Issey Rollerfall has been conceived specifically to make these sunroom areas more liveable. Offering versatile track shapes to follow existing structures with multiple deflections, the graceful Rollerfall creates a room with temperate and visual comfort while allowing natural light and your spectacular panorama to be maintained.

.....
 The motorised, retractable system gives you the power to control the climate by retracting or extending the shade as required, bringing cool shade in summer and warmth in winter. The design possibilities of the Issey Rollerfall are endless with the ability to cleverly manage large spans without losing design integrity. Whether designing a new building or renovating an existing facade, Issey can innovatively design and technically craft a durable, effective system for a harmonious look or an outstanding feature.

issey rollerfall

Windows with deflections can now be protected from heat without compromising design integrity, view and light. Versatile track options allow for its application in a range of situations. The top slope of the window needs to be at least 30 degrees for the system to operate effectively. Ideal locations and uses include:

- Sunrooms
- Waterfall Windows

Fabric

A wide choice of fabric is available to suit your unique situation.

- Screen 86% / 88% / 92% / 96% - When you have a beautiful view, selecting the screen fabric will ensure the majority of heat, glare & UV are prevented while the view is maintained.
- Acrylic 99.5% - A higher block-out factor may be required when maximum heat control or privacy is essential.

Tracks

- Extruded aluminium 'H' tracks 30 (w) x 50 (d)

Bottom Bar

Holds tension on the screen

- Tube - Extruded aluminium round tube 50mm - 65mm

Operation

The ability to retract the blinds gives you the power to control when and how much shade is required:

- **Motorised** - Somfy tubular motors that can be hardwired to a switch or operated via remote control
- **Automatic Sensors** - For enhancement of lifestyle, choose an automatic sun & wind sensor that automatically extends or retracts the systems according to the day's conditions
- **BMS** - Easily integrates with Building Management Systems for convenient and versatile control

Framework

Aluminium frames
Galvanised fabric tube

Fasteners

Stainless steel Bolts, Nuts and Screws

Frame Finish

Powdercoating (All Standard Dulux and Interpon colours)
Anodising (All Standard Colours) Extrusions only

Installation Methods

Each situation is unique and requires different methods of installation. Issey's own installers will create the most suitable method for your application.

- Face Fit

Headbox Sizes & Size Limits

Slimline, powdercoated headbox unobtrusively protects and prolongs the life of the system.

- Width is 800mm-4500mm
- Maximum drop is 6000mm depending on width
- Multiple system configurations are also possible

Please contact issey to discuss your needs further or to arrange a measure and quote.
